

Watch over your fleet without installing hardware

Track your vehicle assets using a combination of telematics (GPS) and intelligent data analysis. LINK provides a solution that boosts efficiency and increases visibility of your fleet. Unlike fleet management products LINK leverages direct vehicle communication to provide real time and accurate vehicle information with no additional hardware required.*

★ Driving Key Metrics **NEW**

Receive updates on seatbelt usage, excessive idling, harsh braking and acceleration

★ Real-time GPS Map Position

See your fleet as well as each individual vehicle on a map

★ Asset Utilization

Find out if your fleet is being effectively utilized

★ Vehicle Key Metrics

Know the vital metrics for your vehicles: oil life, odometer, tire pressure, fuel level

• Driver Behaviour Reporting **NEW**

Report on driver behaviour - seatbelt usage, harsh braking, harsh acceleration and excessive idling

• Safety Scorecards **NEW**

Improve driver safety using LINK's driving score

• Remote Vehicle Immobilization

Prevent vehicle theft by immobilizing your vehicle from anywhere at any time

• Tire Pressure Monitoring System

Know the current tire pressure of your vehicles

• Remote Key Fob

Lock, unlock and start your vehicle from anywhere at any time without physical access to it

• Driver Metrics

Understand how your drivers use the fleet and gain insight into potential efficiencies

• Fleet-wide Indicators

Understand your key indicators that provide a high level view of fleet metrics

• Vehicle Trip History

See a detailed record of vehicle trips: fuel consumed, kilometres driven, start and end time, and more

• Idle Time Monitoring

Identify vehicles with excessive idle time

• Fuel Usage Monitoring

Understand fuel usage patterns of your vehicles

• Vehicle Record Customization

Give unique names and upload vehicle pictures for easy management

• Fleet and Vehicle Fuel Efficiency Stats

Know how efficient your vehicles are

• Carbon Emission Monitoring

Know the carbon output of your vehicles (useful for RFP CO2 emission requirements)

• Fleet Inventory Management

Maintain up to date information on your fleet inventory

• Reports

Make business decisions about your fleet using hard data
